

**New patented children's furniture system
patented license for sale
We look for serious investor**

Welcome to the new era of children's furniture

**This presentation will show
you:**

- **a fully developed product**
- **a masterpiece of genius
engineering**
- **a natural solution for children's
furniture**

**A furniture system which can be adjusted to the needs of a child
from its birth to its adolescent years.**

**This children furniture meets all the requirements of the 21st
century, since it is economical, environment-friendly, practical,
enforces the idea of sustainable development.**

0 months to 6 months

The creator would like to stress upon the medical and infant-care importance of the swinging cradle, as a first sleeping and living area of an infant, of major importance in the development of

their nervous system, center of equilibrium, etc.

The for stages of a child's development:

- baby**
- rompers**
- early adolescent**

The suspended cot:

**Baby (0-6 months):
shelf**

- reminds the infant of the conditions in the mother's womb, which is very pleasant for the infant.

- due to the mild swaying, the baby staying in a cot cries less according to findings
- develops vestibular (equilibrium) system
- promotes early movement, resulting in safer walking later

- according to findings, babies growing up in suspended, swaying cots are more skilled, calmer than the ones staying on fix surfaces

baby dresser

cradle

Late adolescent(10 - 15 years):

bed

learning and computer
desk with self

From 6 months to 3 years

The operations of transformation – dismounting and re-mounting the elements into the new destination – are easy and at hand for everybody, requiring no special skills. It is to be noted that the structure incorporates all the included elements at each stage/variety of the possible structures.
